Adding printers to Mac

- System Preferences > Printers & Scanners
 - If there are printers already listed, you'll have to delete them (click and hit the minus symbol)

9	Sign in to yo Set up iCloud,	the App Store	, and more.				Sign In

		Use:	Generic PostScript Printer	
			you use all the features of your printer.	
			(

• Add the IP address of the printer you want to connect to in the "Address" bar. The IP address can be found by looking at the label on the actual physical printer itself.

• Go to the "Protocol" drop down menu. Select "HP Jetdirect – Socket" driver. This also works for the Xerox printer/copier. (The Kyocera printers should automatically detect the driver after it has been installed on the Mac)
