

Pulse Secure VPN Installation for Windows 7

If you have any issues with this installation, please call 410-955-HELP (4357) for assistance. This is the University IT help desk.

Please note before installing Pulse Secure VPN:

- 1. If you are connected to any other VPN or Citrix remote desktop session, please disconnect before starting this installation.
- 2. This installation should only be run on your local computer, not a workstation in the Press office to which you connect.

Step 1: Open a browser and go to <u>https://my.jhu.edu</u>. If you are not already logged in, click the Log In button and enter your JHED ID and password

Step 2: Scroll down to the bottom of the page and click on the **Technology** category.

Step 3: Scroll down and click on VPN.

Step 4: On the right side of the page, under VPN Client Installs (For New VPN Installs), click Windows.

Pulse Secure VPN

Welcome to the Johns Hopkins VPN Resource Center. Our VPN provides a secure connection to the Johns Hopkins network when off-campus. The VPN can be used to connect from home or a remote location to access applications, websites, and files, that are only available when on the Johns Hopkins network.

The VPN is not needed to access Email via Outlook Web Access, Virtual Desktop, SharePoint, or Office 365 applications and you should not use the VPN for simply "browsing the Internet" or "streaming services". For information on remote access at Johns Hopkins and for guidance regarding when the VPN is needed, please visit the <u>Remote Access at Johns Hopkins</u> page.

What is Required?

- You must have an active JHED account
- You must be enrolled in Azure MFA
- You will need to request VPN access *IF* you are not Johns Hopkins Faculty or Staff
 You must have a computer, smartphone, or tablet with an active internet connection
- For a complete list of supported operating systems and web browsers, <u>click here.</u>

Getting Started

1. Ensure you have enrolled in Azure MFA

Step 5: In the following dialog box, click **Save File**. The file named PulseSecure91R8.exe will be saved to your browser's default download directory.

Step 6: Open the folder that contains your Downloads and double-click **PulseSecure91R8.exe**.

Step 7: If prompted for permission to install, click Yes.

| 😗 Use | 😵 User Account Control | | |
|--------------|--|--|--|
| Û | Do you want to allow the following program from an unknown publisher to make changes to this computer? | | |
| | Program name: Publisher: File origin: | PulseSecure91R8(3).exe Unknown Downloaded from the Internet | |
| Show details | | Yes No | |
| | | Change when these notifications appear | |

Note: The following dialog box may appear. Please wait until the window closes, which should happen automatically in a couple of minutes.

Step 8: Launch Pulse Secure VPN. The installation process is now complete. You may now click the Windows **Start** button and open **Pulse Secure**.

Step 8: Launching Pulse Secure will open the following window. Click Connect.

| Proceed Decline | |

Note: The following windows will display temporarily, then automatically close.

Step 10: To check the status or to disconnect, open the system tray and click the **Pulse Secure** icon.

Step 11: From this icon you may **Connect**, **Disconnect** or **Suspend** your VPN connection. In the example below, the computer is not connected so an option to **Connect** is displayed.

End: You are now successfully connected to Pulse Secure VPN.
